*The Rhode Island Contractors' Registration and Licensing Board ("CRLB") is the agency charged with regulating contractors in the State of Rhode and is governed by Rhode Island General Laws § 5-65-1 et seq. The CRLB claim process is an administrative alternative for property owners who are unsatisfied with the work of a contractor and who wish to resolve the dispute outside of court. NOTE 1: A Renewable Energy Certificate (REC) represents the Environmental Attributes associated with one megawatt-hour of renewable energy as defined by Rhode Island law. RECs generated by the facilities participating in the REG Program are transferred to the utility company in exchange for the incentive payments made to the facility owner under the program. Therefore, while you cannot claim that you are using the solar power generated by the facility, your purchase of a solar array does support solar development in Rhode Island and increase the amount of solar energy consumed by all electric ratepayers in the State.

NOTE 2: All solar PV projects installed under the REG program may be subject to a mandatory third-party inspection.

NOTE 3: Solar installation companies that do not provide accurate information on disclosure forms may be subject to penalties including but not limited to, being named in the annual Office of Energy Resource's Quality Assurance Report.
